WebEx	265
Workshare	266

Section 10: Glossary

This Report reveals:

- How investments in Document Collaboration solutions can deliver real business benefits and improve competitive advantage.
- Why organisations must extend the reach and range of their Document Collaboration capabilities.
- The strengths and weaknesses of different approaches to Document Collaboration.
- Why no single Document Collaboration product, solution, or vendor can satisfy every organisation's needs.
- Where Document Collaboration technologies should be positioned within the organisation's IT infrastructure framework.
- How Document Collaboration products can be used to enhance line-of-business applications.
- The key vendors, products, and technologies in the Document Collaboration market.
- Why Business Process Management and workflow are still important aspects of Document Collaboration.
- How peer-to-peer tools and technologies can solve business problems that centralised systems cannot.
- How Software as a Service (SaaS) will impact upon the traditional Document Collaboration market.
